Instructor-Led Online Courses
The healthcare industry is one of the few career fields that continues to grow despite the economic climate. As a leading educational institution, UCF CE is here to help you start a new career in healthcare or help you advance in your current one.

We are proud to offer graduate programs, certificates, and professional/personal development programs. Choose from our wide variety of programs in this category.
The Department of Health Management and Informatics at the University of Central Florida now offers an online Executive Master of Science in Health Sciences - Health Services Administration Track (e-MSHSA). The program includes an analysis of issues and trends in the health care industry and study of the structure and leadership of health care organizations. Students enroll each Fall as part of a cohort group. The entire program of study can be completed via the Internet with a required two-and-a-half-day, face-to-face meeting on campus each semester. The curriculum emphasizes leadership in career progression, as well as strategic and operational management and development of health care organizations.

Career Opportunities
Health care is the fastest-growing industry in the nation and the second largest industry in the state of Florida. The industry offers a variety of career opportunities in health services administration. Health services administrators deal with the business aspect of the health care industry. They may work for organizations with health care facilities or for organizations that do business with health care facilities. Prospective employers include research and development firms, pharmaceutical companies, insurance companies, computer software firms, physician practices, home health care agencies, retirement centers, free-standing clinics, ambulatory surgical centers, durable medical equipment companies, public health centers and managed-care organizations. Health services administrators are often responsible for million-dollar budgets and hundreds of employees. The complexity of the job, challenge of leadership and motivation, and delivery of efficient and effective high-quality health care combine to make health services administration a rewarding and demanding career.

Who Should Apply
Our ideal candidates for this program are working health care professionals with a minimum of three years of relevant professional experience. A bachelor’s degree is required for admission to the program, as is a minimum undergraduate GPA of 3.0. Admission to the program is competitive and contingent on meeting its requirements. Not all students who apply may be accepted, even if minimum requirements are met.

Cohort Model
The e-MSHSA program uses a cohort model with no more than 30 Students admitted each Fall. The advantages of a cohort model include:

• Increased sense of community
• Enhanced opportunities for networking
• More in-depth coverage of advanced topics

CAHME Accredited
Accreditation by the Commission on Accreditation of Health Care Management Education (CAHME) assures prospective students that the program strives to be exceptional.

For more information, please visit the program website:
www.cohpa.ucf.edu/hmi/emshsa.cfm
The Master of Research Administration (M.R.A.) program is designed for those who are interested in a career as a research administrator. The program of study improves your ability to critically analyze and strategically plan the growth and oversight of research departments, centers, and organizations. Many research administration job opportunities are available in universities, hospitals, public and private medical schools and laboratories, industry research laboratories, regional, state and federal government offices. Grant administrative positions also are available at nonprofit organizations and research institutions.

- No GRE required
- Entire 2-year program offered online, no residency requirements
- Students will progress through the program as a cohort

Who Should Apply
This program provides advanced instruction to those in research administration and those who collaborate with researchers or other innovative science and technology professionals. Applications are only accepted for fall admission and must be submitted online application. (http:/ /www.graduate.ucf.edu). The minimum requirements are an undergraduate degree with at least a 3.0 GPA (on a 4.0 scale) or equivalent. No GRE required. A current resume, statement of Interest, and three letters of recommendation or the contact information from professors or professional individuals must be submitted with the application online.

Curriculum
The MRA program will equip students with the necessary knowledge and understanding of the complex framework and processes of research administration using a comprehensive and holistic approach. The curriculum expands from the initial concept to the commercialization of a new innovation. Students will have the opportunity to examine important issues that impact national and global research endeavors. Coursework in the program includes:

- Introduction to research administration
- Identifying and developing funding opportunities
- Proposal development and preparation
- Contracts negotiation and management
- Research legal framework and compliance regulations
- Intellectual property and technology transfer
- Innovation and science policy
- Ethics and responsible conduct of research
- Leadership and organization development

Career Titles:
Advancement opportunities in the field are more likely with a master’s degree in the field. A majority of research administrators are employed by universities and medical colleges. Positions held by research administrators include: Proposal or Contract Manager/Administrator; Pre-Award/Post-Award Administrator, Program Manager or/Coordinator; Regulatory or Research Compliance Director; Research Integrity Officer; Financial Administrator/Manager of Sponsored Programs; Director/Officer/Manager of Research and/or Sponsored Programs; Senior Licensing Associate or Licensing Analyst; Research Development Associate, Specialist or Coordinator; IRB Manager/Administrator; IACUC Coordinator; Director of Export Controls; Technology Transfer Officer; Grants Accountant

For more information, please visit the program website:
www.ce.ucf.edu/Program/2874/Master-Of-Research-Administration
The Department of Health Management and Informatics at the University of Central Florida is now offering an online Master of Science in Health Care Informatics. The program is enhanced by on-campus sessions and is designed to be finished in 20 months. The program will:

- Develop your leadership and decision-making skills
- Enable you to serve your organization’s information needs
- Teach you to work using an evidence-based, knowledge-management approach

Who Should Apply
Our ideal candidates for this program are working health care professionals with practical experience in clinical or administrative areas. A bachelor’s degree is required for admission to the program, as is a minimum undergraduate GPA of 3.0. Admission to the program is competitive and contingent on meeting its requirements. Not all students who apply may be accepted, even if minimum requirements are met.

Curriculum
The Master of Science in Health Care Informatics will be awarded upon completion of appropriate prerequisite course work and 36 credits of prescribed graduate study. Credits must be taken in health-services management, health care informatics, research practicum/thesis, a symposium course and a seminar on health care informatics research. The health care informatics program is unique in that it will focus on providing students with a thorough grounding in the clinical, management and business aspects of the health informatics field. The program will be offered through an online, distance-learning format to offer access and convenience to working professionals.

Course Requirements
Once you’ve completed any and all prerequisite course work, you will need 36 credit hours of required graduate-level courses — that’s all — and you can finish in 20 months. This course work includes these areas and projects:

- Health-services management
- Health care informatics
- Database management
- Symposium
- Seminar on health care informatics research

Getting a Job
Graduates can work as practitioners, managers, analysts and researchers. Numerous openings have been announced in several environments, including health centers and health insurance companies.

For more information, please visit the program website: www.cohpa.ucf.edu/informatics
Program Background
The Florida Legislature enacted the “Comprehensive Medical Malpractice Act of 1985,” which requires certain health care facilities to employ a licensed Risk Manager. The Agency for Health Care Administration is responsible for enforcing this mandate, and verification of compliance is now included in their procedures.

This fully online program complies with the 120-hours of Risk Management education required by the State of Florida and includes the examination to become a Licensed Health Care Risk Manager. Participants can complete the program in a self-paced mode within a 10-month period. Course format includes online lectures, homework, projects, and additional work as assigned. Questions and tests will be monitored and graded by faculty.

Who Should Enroll
The course is designed for those students who have a background in health care administration or who are licensed as a health care provider in Florida. Typical job titles who qualify for licensure include Registered Nurses (RN’s; CEUs available!), Medical Doctors (MD’s), Health Information Managers (RHIA, RHIT), Pharmacists, Respiratory Therapists (RRTs), Radiologic Technologists, Administrators, Osteopathic Physicians, Podiatrists, Chiropractors, Emergency Medical Technicians (EMT’s) and other professionals in the healthcare industry. Please contact AHCA @ 1-888-419-3456 to check your individual status.

Curriculum
This course is designed to teach the student:

- background, history and philosophy of health care risk management;
- Florida statutory requirements for a health care risk management program including state reporting requirements of adverse incidents;
- to develop a plan for a comprehensive health care risk management program in a licensed facility including incident reporting procedures;
- knowledge of medical malpractice claims investigation and settlement;
- methods of identifying clinical risks, determining methods to resolve those risks, and developing methods of monitoring patient outcomes;
- methods of interpreting contracts and purchasing insurance;
- safety issues including OSHA regulations for health care facilities;
- ethical decision making, statutory requirements for advanced directives;
- and the interrelationship of various programs such as quality improvement, infection control, utilization management and safety with risk management.

Legal Nurse Consultant Certificate Program

Program Background
This fully online program allows students to learn anytime, anywhere, making it convenient for the working professional. Students will have access to 10 extensive modules to get you started working as a Legal Nurse Consultant. The program offers over 30 hours of video instruction presented by legal professionals. Students will have real life experience of working on an actual case study and get a full review on the final case work. The online course format provides access to all course materials, assignments and videos conveniently from one site. Access to the course forum will allow students to contact the instructor, post a question or start a discussion with other students. The course package also includes 71 hours of nursing CEU’s, provided by the UCF College of Nursing.

Who Should Enroll
This course is designed for those students who already have an active RN license and are looking to use their clinical experience and expertise in the legal arena. A successful legal nurse consultant possesses several quality traits that will tap into his or hers clinical experience. He or she is analytical, assertive, organized and efficient. The legal nurse consultant verbally communicates effectively, is skilled in professional writing and knows how to prioritize his or her work schedule.

Curriculum
The Legal Nurse Consultant program consists of 10 lesson modules, video lectures, reading assignments, post-tests, and a final case study. Because this program is designed by legal nurse consultants, students will learn how to:

• Review medical records pertaining to a case and identify the 4 elements of negligence.
• Locate and select appropriate health care experts who are needed to testify on the strengths or weaknesses of the merits of a case.
• Draft written reports and chronologies for the lawyer, risk manager or claims manager.
• Identify what skills and efforts are necessary to become a successfully practicing legal nurse consultant in today’s market.
• Describe the various roles of the Legal Nurse Consultant in the work environment
• List the steps in the evolution of a lawsuit
• Analyze a negligence claim for merit and standard of care issues
• Develop a format for communicating case issues and findings
• Identify the laws that impact medical malpractice and nursing home negligence claims

Online Course Features
• Video streaming lessons (over 30 hours)
• Work on actual cases
• Faculty easily available
• Get a full review on your final case work
• Access all course materials, assignments, and videos from one site
• interact with speakers, faculty and other students

**Program Description**

This nationally recognized Administrative Dental Assistant online certificate program teaches the essential administrative tasks for managing the business aspects of a dental practice and becoming an Administrative Dental Assistant. This program includes instruction in dental terminology and anatomy, medical records management, accounts receivable and reimbursement management, insurance and patient billing, patient scheduling, and procedural and diagnostic coding. The Administrative Dental Assistant online program will prepare you for a new career working in a dental office. Textbooks included.

**Prerequisites**

No dental office work experience is required.

**Location**

Online at your own pace

*For more information, please visit www.ce.ucf.edu and click on the Health category.*

---

**Program Description**

The Administrative Medical Specialist with Medical Billing and Coding (AMS/MBC) will give you the skills you need to find the job YOU are looking for as an Administrative Medical Specialist (AMS), Medical Billing Specialist, Medical Coder, and/or Medical Office Manager. In addition to the extensive Medical Billing and Coding instruction, you will learn all the tasks and skills for an Administrative Medical Specialist, including those in the “front office” and the Business Office.

**Prerequisites**

A basic understanding of medical terminology is a prerequisite for this program.

**Location**

Online at your own pace

*For more information, please visit www.ce.ucf.edu and click on the Health category.*
Program Description
The Administrative Medical Specialist with Medical Billing and Coding + Medical Terminology program will give students both the complete AMS/MBC program plus a 60 hour Medical Terminology course!

Prerequisites
No healthcare work experience is required.

Location
Online at your own pace

For more information, please visit www.ce.ucf.edu and click on the Health category.

Advanced Coding for the Physician’s Office

Program Description
Continuous changes in the medical billing and coding profession, as well as HIPAA changes, have created an incredible demand for people trained in coding. CPT, ICD-9-CM (Volumes I and II), and HCPCS Level II coding are covered in this program, along with information on the Correct Coding Initiative (CCI), compliance and reimbursement issues, E & M guidelines, and much more. You'll get important tips to increase your accuracy in code selections and make the billing process smoother, resulting in quicker and better reimbursement.

This program will prepare you for the Certified Professional Coder (CPC) certification exam offered by the American Academy of Professional Coders (AAPC).

Prerequisites
This program is designed specifically for students who have previous coding experience or education, such as the Administrative Medical Specialist Program.

Location
Online at your own pace

For more information, please visit www.ce.ucf.edu and click on the Health category.
Program Description
The CNPR Program was developed in partnership with the National Association of Pharmaceutical Sales Representatives (NAPSR). This unique training program will prepare you for a new career as a pharmaceutical sales representative and for national certification through NAPSR. As a registered student of the CNPR program, you’ll automatically become a member of NAPSR, and you’ll be eligible to sit for the CNPR national certification exam at no additional cost.

Prerequisites
Students should be proficient in keyboarding, have a basic understanding of a word-processing computer program (Microsoft Word recommended), and have a command of English grammar and punctuation. No healthcare or medical-office work experience is required.

Location
Online at your own pace

For more information, please visit www.ce.ucf.edu and click on the Health category.

ICD-10 Medical Coding

Program Description
ICD-10 is a radically upgraded diagnostic and procedural medical coding system that, by law, must be implemented throughout the healthcare industry by October 1, 2013. This new coding system is very different than the version currently in use, and it's important to start preparing for and implementing the massive changes to the existing coding system. This online program includes training in use of the new ICD-10 diagnostic and procedure codes for insurance billing and reimbursement, including an in-depth review of the ICD-10-CM (diagnoses) and ICD-10-PCS (procedures) coding manuals, guidelines, instructional notes, conventions, and coding steps.

Prerequisites
In order to take this program, you should have some knowledge of medical terminology. Education in anatomy and physiology is strongly recommended, but not required.

Location
Online at your own pace

Emergency Management Training for First Responders

Program Description
The growing number of disasters in recent years has placed the field of emergency management in the spotlight. The demand for skills in this field is increasing out of necessity, and skilled job seekers will be able to choose from opportunities in both the public and private sector.

This multimedia-rich program addresses all phases of emergency management: the social and environmental processes that generate hazards, hazard and vulnerability analysis, hazard mitigation, emergency response, disaster recovery, and emergency planning. You’ll gain a solid understanding of emergency management principles and practices.

Prerequisites
A high school diploma or GED are required to complete this program.

**Medical Terminology**

**Program Description**
The Medical Terminology Online Training Program will teach you to understand not only medical terms themselves, but also their application. You’ll start by learning the origins of medical words and how to recognize prefixes and suffixes used in medical terminology. Then you’ll learn about the body as a whole and how to differentiate cells, tissues, organs, systems, and cavities. Next, you’ll learn to define and describe the function of each system of the human body. This knowledge will help you take the next step in your medical career or education.

**Prerequisites**
There are no specific prerequisites for this program other than basic computer skills and an Internet connection.

Our instructor-facilitated online courses are informative, fun, convenient, and highly interactive. Our instructors are famous for their ability to create warm and supportive communities of learners.

All courses run for six weeks (with a 10-day grace period at the end). Courses are project-oriented and include lessons, quizzes, hands-on assignments, discussion areas, supplementary links, and more. You can complete any course entirely from your home or office. Any time of the day or night. Courses start as low as $89. New course sessions begin monthly.

Please visit www.ce.ucf.edu and click on the Health category to see exact start dates for the courses that interest you.

**Alternative Medicine**

**Certificate in Bioenergy and Spiritual Healing (Non-Credit)**
Participants will gain a broad understanding of bioenergy and spiritual healing as they will gain additional healing skills and enhance their professional marketability.

**Certificate in Complementary and Alternative Medicine (Non-Credit)**
In this certificate course you will gain the ability to understand the many types of therapies available is essential to providing safe, effective care in any setting.

**Certificate Programs**

**Certificate in End of Life Care (Non-Credit)**
The course is designed to enhance the knowledge and skills of individuals who work with dying patients by providing a multidisciplinary educational experience.

**Certificate in Growth and Development Through the Lifespan (Non-Credit)**
You’ll gain insights into the peaks and valleys of human development and develop unique opportunities to further your relationships with colleagues and patients.

**Certificate in Integrated Health (Non-Credit)**
In this 12-lesson certificate program you’ll learn the fundamentals of this person-centered and person-empowered approach to health care.

**Certificate in Issues in Oxygenation (Non-Credit)**
This certificate program will provide you with a holistic and collaborative approach to the care of patients with disorders of oxygenation.

**Certificate in Spirituality, Health, and Healing (Non-Credit)**
In this course you will gain a broad understanding of spirituality, health, and healing and to stay current with emerging trends, health professionals who work with diverse religious and spiritual populations will need continuing professional education.

**Introduction to Natural Health and Healing (Non-Credit)**
Discuss the various stages of health and illness, and you’ll discover that true health means wholeness of the mind, body, and spirit.
Instructor-Led Online Courses

Graduate Degree Programs

Master of Science in Health Care Informatics (Non-Credit)
A unique program that will focus on providing students with a thorough grounding in the clinical, management and business aspects of the health informatics field.

Master of Science in Health Sciences- Health Services Administration
This curriculum emphasizes leadership in career progression, as well as strategic and operational management and development of health care organizations.

Health Care Specializations

Become a Physical Therapist
Prepare for a rewarding career as a valued member of the physical therapy team while learning all about the human body, specific disorders, and the way physical therapists treat these disorders.

Become an Optical Assistant
You’ll see why optometry is such an interesting field and how rewarding it can be to help people solve their vision problems.

Clinical Dental Assistant
This course gives you an overview of the dental profession, dental health and disease, anatomy and physiology, infection control, basic dental assisting, and much more.

Explore a Career as a Pharmacy Technician
By the time you’re done, you’ll be well prepared to start your career in this popular and rapidly-growing field.

Explore a Career as an Administrative Medical Assistant
Learn what it takes to have a successful career as an administrative medical assistant in the exciting and high-demand world of healthcare.

Explore a Career in a Dental Office
Find a career to fit your skills and personality as you go behind the scenes in a typical dental office.

Handling Medical Emergencies
This course will identify common medical emergencies affecting children and adults, help you recognize signs and symptoms, and teach you how to render appropriate emergency care.

Explore a Career in Medical Coding
With this course, you’ll learn how to use the CPT manual and the ICD-9-CM to find medical codes for any disease, condition, treatment, or surgical procedure.

Explore a Career in Medical Transcription
In this course, you’ll learn how to transcribe the most common medical reports used in both inpatient and outpatient settings.

Human Anatomy and Physiology
This course explains how the circulatory and respiratory systems work together to provide our bodies with the oxygen our tissues need.

Human Anatomy and Physiology II
By the end of this course, you’ll have an even greater appreciation of the complexity and wonder of the human body!

Medical Coding and Terminology

Medical Math
Whatever medical field you’re in, the hands-on activities in this course will help you perform day-to-day math tasks quickly and easily.

Spanish for Medical Professionals
This fun and simple course will give you the basic tools you need to bridge the communication gap for your Spanish-speaking patients.

Veterinary

Become a Veterinary Assistant
This course, taught by a practicing veterinarian and college instructor, will give you the information you need to prepare for work in veterinary hospitals.

Become a Veterinary Assistant II- Canine Reproduction
This course will help you understand the essential facts so you can knowledgeably converse with clients on the complexities of canine reproduction.

Become a Veterinary Assistant III- Practical Skills
Learn the practical skills you’ll need to be a valuable veterinary assistant or educated pet owner. It’s as close as you can get to actually being right there in the veterinarian’s office!

Veterinary Assistant
This program will teach you how to help keep animals’ healthy, care for them when they’re ill, and assist veterinarians in their offices.
